WordPress 3.1

If you are using WordPress Contact Form 7, you might want to redirect visitors to a thank you page when they successfully fill in your form. Ideal if you track completed goals in Google Analytics.

How To Redirect Visitors To A “Thank You” Page In Contact 7 for WordPress:

Go To WordPress dashboard and go to Contact Form 7 plugin settings page (click contact in your dashboard). Find ‘Additional Settings’ at bottom of your form page and insert the following code:

```
on_sent_ok: "location.replace('http://www.yourwebsiteaddress.co.uk/thankyou/');"
```

Save form

Now visitors will be successfully redirected to your custom thank you page when they fill in your WordPress Contact 7 form.

* Rel:Noindex/Follow your ”thank you” page to keep it out of Google SERPS using a Robots Meta tag.
