[Add custom tab to featured image media library popup](#)

By: [Kevin Chard](#) | June 13, 2011 | [admin](#) | [0 Comments](#) | [wordpress](#)

computer Adding this snippet to the functions.php of your wordpress theme will add a new tab to the featured image popup called mime types. Clicking on this tab will display a list of the allowed file types however this could be changed to display almost any information.

As requested by Cor van Noorloos, I added a screenshot to better explain the snippet. ([view screenshot](#)).

PHP

```
01 function mime_type_tab($tabs) {  
02     /* name of custom tab */  
03     $new_tab = array('mimeframe' => __('Mime Types', 'mimetype'));  
04     return array_merge($tabs, $new_tab);  
05 }
```

```
06 add_filter('media_upload_tabs', 'mime_type_tab');
07 function create_mime_type_page() {
08     media_upload_header();
09     wp_enqueue_style( 'media' );
10     /* add custom code to display bellow this line */
11     /* display mime types */
12     $mimes = get_allowed_mime_types();
13     $types = array();
14     echo '<div class="type-outer">';
15     echo '<h3 class="media-title">Supported file types</h3>';
16     echo '<hr />';
17     foreach ($mimes as $ext => $mime) {
18         $types[] = '<li>' . str_replace('|', ' ', $ext) . '</li>';
19     }
20     echo '<ul class="mime-types">' . implode(' ', $types) . '</ul>';
21     echo '</div>';
22     /* end custom code */
23 }
24 function insert_mime_type_iframe() {
25     return wp_iframe( 'create_mime_type_page' );
26 }
27 add_action('media_upload_mimeframe', 'insert_mime_type_iframe');
28 add_action( 'admin_head', 'mime_frame_css' );
29 function mime_frame_css() {
30     echo '<style type="text/css">
31     .type-outer{margin:20px;}
32     .type-outer hr{
33         border:solid #ccc;
34         border-width:0px 0px 1px 0px;
35         margin:0px 0px 20px 0px;
36     }
37     .mime-types li{
38         font-size:10px;
39         float:left;
40         width:24%;
41         padding:1px;
42     }
43     </style>';
44 }
```
